Presentation Review: Shoestring – Probabilistic Soft Error Reliability on the Cheap

Positives

Your presentation was well structured and your slides looked good. You did a good job of speaking clearly so that it was easy to understand everything. You allowed a lot of time after asking questions to allow us to think about answers. This is good for generating discussion, which was one of my weak points when presenting.

Improvements

Reading straight from the slides a lot. Try to put just main points on the slides and be able to talk about them from your own knowledge. I didn't really understand the figures any better than I did before you explained them, but I don't think that's necessarily your fault since the authors were a bit unclear about a lot of stuff anyway. Otherwise good job.
